DETAILED ACTION

1. Claims 1-7 are pending.

Election/Restriction

2. Applicant's election with traverse of Group XXVI, Claims 1-7 in Paper No. 14 is acknowledged. The traversal is on the ground(s) that no lack of unity was found in ISR (international Search Report) and in IPER (International Preliminary Examination Report).

This is not found persuasive because the United States Patent and Trademark Office is *not* bound by the lack of unity determination by another International Searching Authority. MPEP 1875 states that whether or not the question of unity of invention has been raised by the International Searching Authority, it may be considered by the examiner when serving as an authorized officer of the International Preliminary Examining Authority. Thus, the Examiner is *not* bound by any previous determination made. In addition, 37 C.F.R. 1.484 indicates that the international preliminary examination is a non-binding opinion. Finally, 37 C.F.R. 1.499 states that, if the Examiner finds that a national stage application lacks unity of invention under 37 C.F.R. 1.475, the Examiner may in an Office action require the applicant in the response to that action to elect the invention to which the claims shall be restricted. Thus, the determination of lack of unity is proper under the PCT treaty.

In regard to the argument: "As stated in MPEP 1875, the examiner may when preparing the IPER consider whether the international application complies with the

Art Unit: 1624

requirement of unity of invention...", the examiner disagrees with applicants. Since the examiner is not preparing an IPER, the argument is invalid.

Note that the molecule as a whole has very little invariant structure. A carbon attached to a nitrogen is required at 2 points, but the rest of the molecule has nothing in common.

The requirement is still deemed proper and is therefore made FINAL.

3. The claims are drawn to multiple inventions for reasons set forth in the restriction requirement. The claims are examined only to the extent that they read on the elected invention. Cancellation of the non-elected subject matter is recommended in response to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

Art Unit: 1624

- a. In claim 1 and claims dependent thereon are rejected because the phrase "general formula" is indefinite. A formula cannot be general, but specific. It is recommended that applicants delete "general" from said phrase to overcome the rejection.
- b. In claim 1, the variable "R₃" in the chemical structure formula (I) should read as "R³".
- c. In claim 1 (page 12, line 8), the phrase "X may form a condensed ring" is indefinite. What ring? Carbocyclic or heterocyclic? Size of the rings? If heterocyclic, what is the nature and number of the heteroatoms in the ring?
- d. In claim 1, the phrase "R¹ and R² may form a 4 to 7 membered ring by combining to each other" is not clear. Since R¹ and R² are attached to N, it is recommended that the claim read as "R¹ and R² together with the N to which they are attached may form a 4 to 7 membered ring by combining to each other."
